ARE MADE OF HIGH
QUALITY
PoliTerm materials.**

Bars

Bars are standard length (L) 1,000 mm and diameter in the range (Ø) 10 -500 mm.

Within these dimensions there is a possibility of different combinations of orders depending on the type of material.

The standard colors of the bars are black and white, but it is possible to choose a different color, also depending on the type of material.

Plates

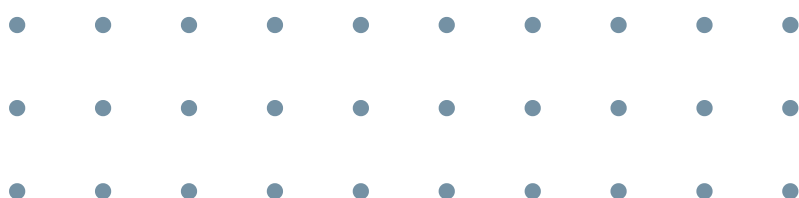

The plates have a maximum width of 1500mm, a length according to the standard of 3000 mm, and at your request it can be longer.

The thickness of the plates can range from 1-100 mm, and within these dimensions

there is the possibility of different combinations of orders depending on the type of material.

Standard plate colors are black and white, but it is possible to choose a different color, also depending on the type of material.

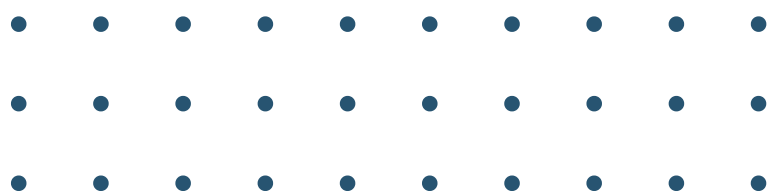

We make them in different colors from solid plastic and without metal parts.

Cake racks can be fixed or foldable.

These racks, which are easy to manipulate and maintain, we offer in several basic sizes, or with dimensions according to your wishes.

Tray thicknesses are 5-20 mm, and tray diameters are in the range of Ø 100-600 mm.

Pizza and countertops

HO RE CA

We make pizza bases and work pads in sizes that suit you.

Pizza substrates

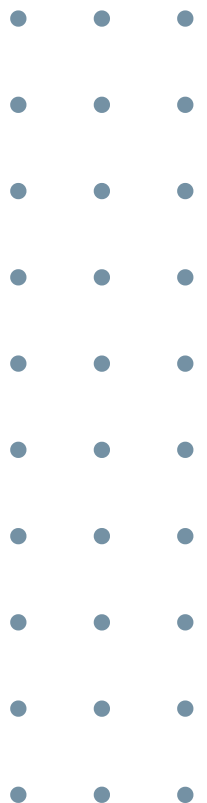

Dimensions from fi 400 to fi 520,
with 4, 6 or 8 divisions

Workpads

Basic dimensions:

- Thickness: 1 - 6 mm
- Surface dimensions 1500 x 3000 mm and all combinations within these dimensions.

Work surfaces are most commonly used in butchery, bakery industry, pastry shops...

Bucket trolley (bucket saddle) and multipurpose trolley are made according to clients' requirements

Trolleys for plastic boxes

The trolley is designed for lodging sized with standard dimensions of 400 x 600mm.

The wheels are 100 swivel in diameter (Ø) 100 made of plastic, but at your request we also set other types.

The carrying capacity of the trolley for plastic boxes is 50 kg.

Trolleys for food containers

The carrying capacity of the trolley for food containers is 80 kg.

The basic dimension of the load-bearing plate is (HxWxD) 50 x 400 x 400 mm, and the plate is supported by four swivel rubberized points (Ø) 75 mm.

Food container is placed in a bed 20 mm deep.

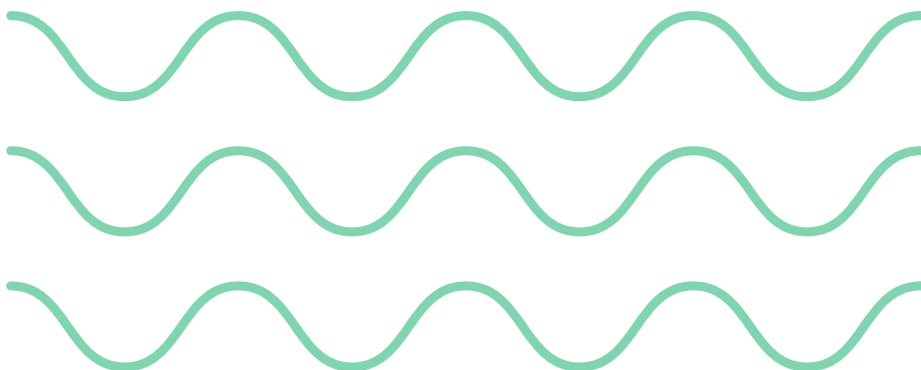

These barrels are mainly used for wine or brandy.

The most common volumes in our offer are from 50 to 100 liters.

We produce them with taps, racks, with or without reinforcement, all according to your requirement and needs.

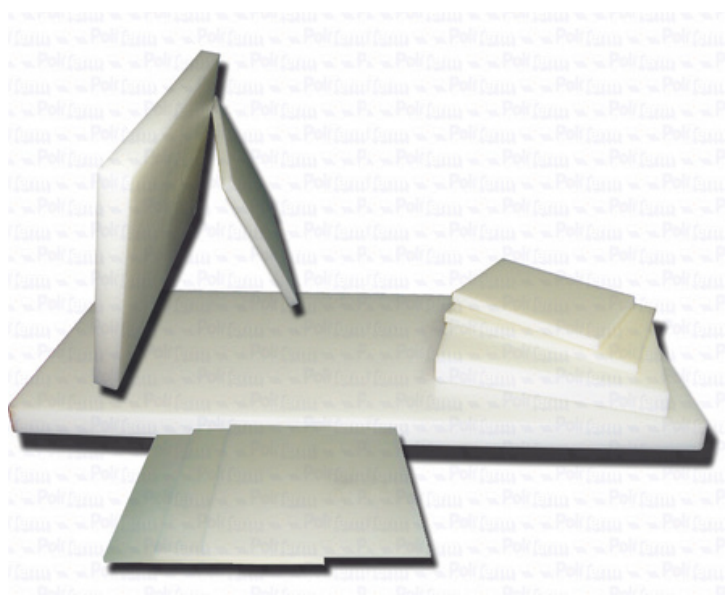

Our barrels and barrels have resistance to acidic environments.

Cutting boards

HO RE CA

The basic colors of the cutting boards are white, red, blue, green and yellow.

We produce them in several basic dimensions, and on request we make boards by dimensions from your order..

Basic dimensions - HDPE (HxWxD):

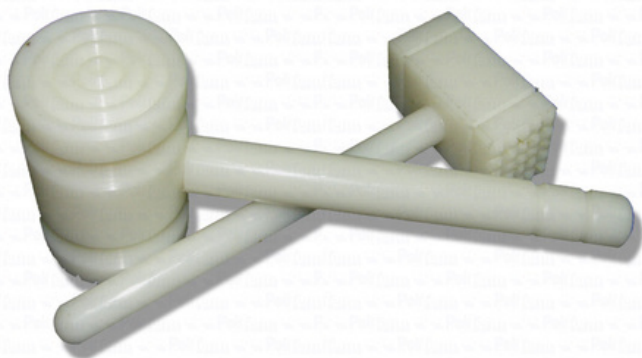

- 10 x 200 x 300 mm
- 10 x 300 x 500 mm
- 10 x 400 x 600 mm
- 20 x 250 x 330 mm
- 20 x 300 x 500 mm
- 20 x 400 x 600 mm
- 30 x 300 x 400 mm
- 30 x 400 x 600 mm
- 30 x 500 x 600 mm

Rolling pins and hammers

HO RE CA

The basic colors of the rolling pins are white, red, blue, green and yellow. The basic color of the hammer is white.

Rolling pins and hammers are produced in several basic dimensions, and on request we make boards according to the dimensions from your order.

Rolling pins

Basic dimensions:

- Ø 50 x 300 mm
- Ø 50 x 400 mm
- Ø 50 x 500 mm
- Ø 60 x 600 mm
- Ø 80 x 600 mm
- Ø 80 x 600 mm

Hammers

Basic dimensions:

- L-250, Ø 60 x 80 mm
- L-300, Ø 80 x 100 mm
- L-400, Ø 100 x 120 mm

Moulds and cheese carriers

Shelves for cheese

- We produce fixed and movable shelves, which can be with full or perforated cheese carriers.
- Cheese shelves are made according to your request.

Moulds

- round or rectangular
- with a lid (fixed or sliding)
- with or without a diary
- with or without perforations.

Cheese carriers

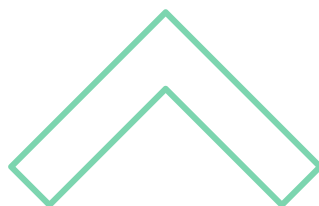

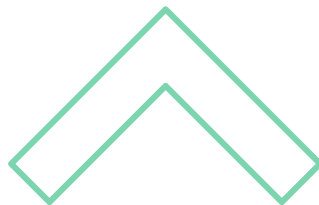

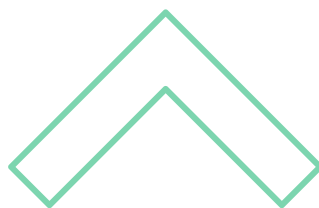

- with or without a cover
- round or rectangular
- with one or more outlets
- with or without legs.

Plastic boxes

Basic dimensions:

- (L x W x H) (400 x 600 x 150) ,mm
- (L x W x H) (400 x 600 x 200) ,mm
- (L x W x H) (400 x 600 x 300) ,mm

Butcher stumps and PAND tables

Butcher stumps are made in two variants, with a roostfraj inox and without a inox pedestal.

We produce them in several basic dimensions, and on request we make boards by dimensions from your order.

Butcher stumps with roostfraj stand

Basic dimensions - HDPE:

- 100 x 500 x 500 / Height 860 mm
- 100 x 500 x 600 / Height 860 mm
- 100 x 500 x 700 / Height 860 mm
- 100 x 700 x 700 / Height 860 mm

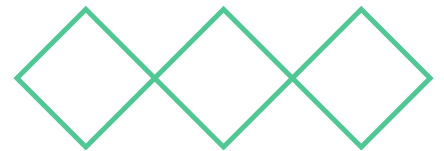

Butcher stumps and PAND tables

Butcher's stumps without a rostfraj stand

Basic dimensions - HDPE (HxWxD):

- 100 x 500 x 500 mm
- 100 x 500 x 600 mm
- 100 x 500 x 700 mm
- 100 x 700 x 700 mm

Fishing table with a pedestal

Basic dimensions - HDPE:

- 100 x 500 x 500 / Height 860 mm
- 100 x 500 x 600 / Height 860 mm
- 100 x 500 x 700 / Height 860 mm

Butcher stumps and PAND tables

Butcher tables for meat processing

The table support is made of inox, and the working surface consists of two plastic HDPE boards.

The larger worktop is fixed and can be made of inox or plastic.

The smaller worktop is interchangeable, so the table maintenance costs are lower.

Basic dimensions of the butcher's panda table:

- Table height 850 mm
- Interchangeable plate 30 x 300 x 2000 mm
- On request we make boards and by dimensions according to your requirements.

Laboratory equipment Industry

Laboratory tables and shelves

Laboratory tables, shelves and sinks can be made as a whole or work surfaces can be sheathed with acid-resistant plastic materials.

Laboratory trays and cassettes

We produce laboratory cassettes for dryers, sterilizers. We make them from plastic or stainless steel, all depending on the purpose.

Laboratory trays are also adapted to the requirement, and can be perforated, acid-resistant, waterproof ...

Bathtubs and electroplating drums Industry

Electroplating bathtubs

Depending on the technological requirements, we make bathtubs from HDPE and HDPP materials.

These tubs are acid-resistant, and by construction they are self-supporting. They can be made entirely of thermoplastic (plastic) or with inox reinforcements in which only the cartridge is made of thermoplastics.

With bathtubs, you can also get accompanying acid-resistant centrifugal pumps and fans.

Electroplating drums

The drums are made of thermoplastics, and are also acid-resistant.

Stamping plates for textiles and leather Industry

Stamping plates are used in the leather and textile industry for cutting on stamping machines or when tailoring.

We produce the basic stamping boards in basic dimensions:

surface : 450 x 900 mm

Thickness: 40 and 50 mm

Overhead boards – dimensions:

surface : 500 x 1.600 mm

Thicknesses: 50, 60, 80 and 100 mm

We also make plates according to special requirements in terms of dimensions.

Repellent and perforated plates

Industry

Perforated plates - use:

Laboratory equipment, production of filter bodies, tool holders, process installations, food industry, parts of machines and tools (such as fruit kernel sprouts), parts of sound insulation walls, aesthetic elements ...

Repellent and cladding plates - use:

Lining the walls of bunkers, embankment bunkers, coasters as cargo supports (for cranes, cranes, truck stops), wall bumpers of warehouses, bases of chains and transporters, for distilling cans when pairing in autoclaves ...

Special floors and supports

Industry

Special flooring

Special floors are made of solid material, from slats or from constructive honeycomb material. so they have high rigidity, and a small mass. They can be perforated.

They are used as cargo supports in factories and warehouses, as covers of manholes or canals, as floors of vessels, and are widely used in construction...

Supports foottrucks and cranes

We make them from a tough full material that suffers a large temperature range, and with adaptive dimensions.

Supports of small marine engines

Suitable for small marine engines. They are machine-working and have excellent mechanical properties, they are also water-resistant, resistant to oils, lubricants and salt water.

Machine elements

Industry

Machine elements

Machine elements such as gears, transport snails, pulleys, sprockets, transport stars and roller skates. We make by pattern, model or technical drawing, as a separate element or as an assembly. Of course, we also help you in choosing materials.

Other mechanical elements

And all other machine elements are made according to a pattern, model or technical drawing, as a separate element or as an assembly, helping to select materials.

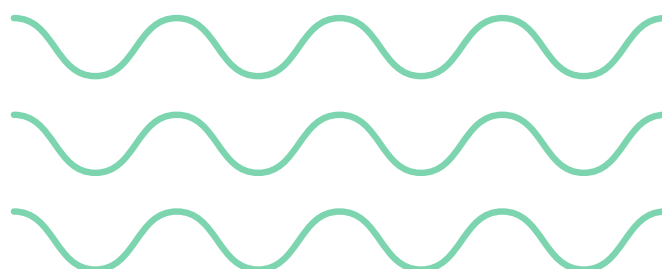

Sliding bearings

Industry

Common use of sliding bearings:

- where there is moisture, dust, shavings;
- where resistance to chemicals is required;
- where the number of revolutions is not too large;
- where non-lubricating work is required or lubrication is difficult;
- Where you need a cheaper and more efficient solution.

Sliding profiles - rails- guides Industry

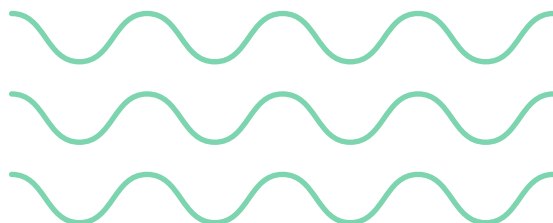

Apply:

Bolt nuts (spindles) for cranes

Excellent, twice as cheap replacement for metal nuts, and we make them from original PA6 material, which ensures high reliability and longevity.

Corner skirting boards, Profiles (U-T-L), Supports (cranes, elevators).

Depending on the purpose, we choose materials for you, and according to your request, we do almost all possible dimensions and shapes.

Dental equipment

Box for dental technology (for processing dental models)

The material of this box is HDPP durable resistant plastic, and the lid is made of easily washable tempered glass.

The drawer is pull-out with a pre-refurbished extraction tray.

The dimensions of this box for dental technique are Width 45cm, Height 36.5cm and Depth 35.8cm.

The dental box is very easy to maintain.

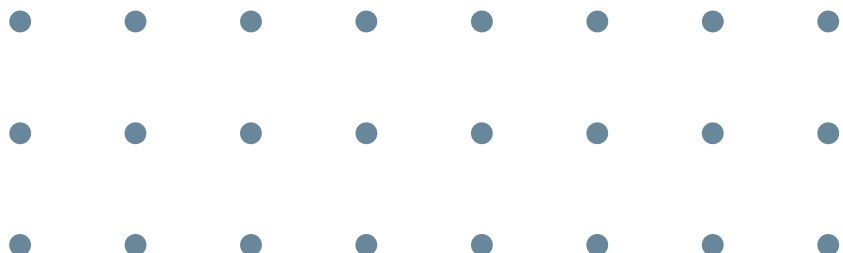

Products on request

Seemingly small ideas for creating big things.

Over the past 30 years, we have produced many revolutionary things for you. From small parts for cars and appliances, to large industrial products that facilitate production and business.

We are here to make all your plastic ideas a reality.
